Use Dr. Hess & Clark Products

This is what our latest Bulletin from the Research Branch says:

When prices are high the cost of producing Pork, Milk and Eggs is not so important.

But now only the Dairy, Hog and Poultry men who are cutting production costs are doing business at a profit. Never was there a time when conditions of farm animals was so important.

No time now for malingering, worms, unthrifty sheaths, or wormy, listless hens.

Our tests prove that the dairyman who will condition his cows with DR. HESS TONIC before calving, so that there is no backset, then continue the tonic to keep their appetites on edge so that there is no minding, can produce milk right now at a profit.

75 per cent. of all Hogs have Worms—Hog Special is given in the feed. No fasting no set back.

Worms in Poultry—Ver-mi-trol is a flock treatment that combats the worms, and egg producing steps up from almost the first dose. Then you must have Pan-A-Min to keep them in laying trim.

Peggy Prints

Yard

19c

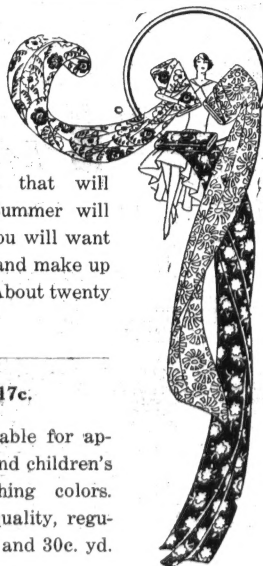

Bright cotton print that will make you think Summer will soon be here and you will want to start right now and make up your wash frocks. About twenty different patterns.

Ginghams 17c.

Small patterns suitable for aprons, house frocks and children's wear. Good washing colors. Clearing our best quality, regularly priced at 25c. and 30c. yd.

Bleached Canadian Sheeting 47c.

A serviceable quality of good weight and firmly woven from strong cotton yarns. 2 yards wide You save six cents a yard.

Unbleached Sheeting 37c.

Agreat value for every day use. Easily bleached. 2 1/4 yards wide.

Wabasso Printed Broadcloth—Fast Colors

Bright New Patterns 23c.

The lowest price we have quoted for goods of such sterling quality. They are all new spring designs, including dots and floral patterns. Dark and light shades for frocks, smocks, pyjamas and children's dresses. Do your Summer Sewing Now.

Columbia Chintz 22c.

Yard wide drapery chintz in fresh, bright designs. An opportunity to brighten up your home at a big saving.

Patchwork Printed Cotton 34c.

Yard wide quilt cotton in the popular patchwork effects.

Bleached Pillow Cotton 34c.

Its not often one can buy such serviceable, circular woven pillow cotton at this low price, so do not pass over this sale. 40 inches wide.

68 inch Table Damask 69c.

Reduced from 85c. and only one piece to clear, prettily patterned, of good quality for family use.

Printed Foulards 32c.

Silky finished cotton foulard at a saving of eight cents a yard. They are Mill Ends, short lengths of eight to twelve yards. Navy grounds with a variety of small white or sand patterns.

Yard Wide Factory Cotton 16c.

A popular quality for every day use. Buy now and save.

Canton Flannel—Bleached 26c.

Beautifully soft and firmly woven. Bleached snow white.

Linen Checked Tea Toweling 27c.

An all linen weave, of good texture, red checks.

Bleached Pillow Cotton 43c.

42 inch, fine quality, snow white pillow cotton. Regular 50c. yard, on sale now.

Women's Slide Fastner Overshoes Less Than Half Price \$1.45

Its true economy to buy at this sale price. Black cloth top overshoes with Cuban heels and medium toe. Very comfortable. Easily opened or closed. Sizes 3 1/4 to 5 1/4 only.

Most Of Our Pork Products Go To Great Britain In The Form Of Wiltshire Cut Sides

Canadian swine producers who have made any study of the breeding, feeding and marketing of bacon hogs have come to realize that most of our exportable pork products go to England in the form of Wiltshire-cut sides. They have learned that the term "Wiltshire" is a trade name given to any carcass of pork which is cut in a particular manner. A Wiltshire side is simply half of the hog with the head and feet cut off, the shoulders, blade pulled out, and the backbone removed.

Usually these sides are exported from Canada in a pickled or mild cured state. The smoking operation is performed later in England by the large wholesalers and distributors, who vary the degree of smoke with the preferences of the particular market to which any lot of sides is to go.

Questions are often asked as to what cuts are made of the Wiltshire side for retail selling. An explanation of the method of cutting, together with interesting comments on the various cuts and their relative value, is found in a comprehensive publication by the Ministry of Agriculture in England.

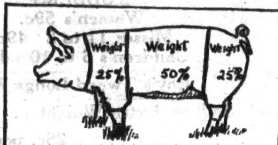

Fig. 1. Relative weight of Fore-end, Gammon, and Middle of an ideal bacon hog.

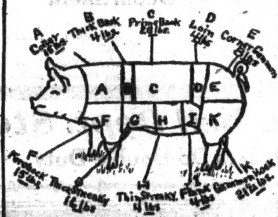

Fig. 2. Standard English retail cuts of Wiltshire bacon in relation to live pig.

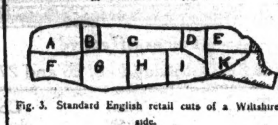

Fig. 3. Standard English retail cuts of a Wiltshire side.

culture and Fisheries in England, entitled "A Report on the Pork and Bacon Trades in England and Wales." The three outline figures reproduced herewith are taken from that report, adapted slightly in order to conform with the weights and percentages of Canadian standard bacon hogs and their product.

Figure 1 is of a bacon hog of approximately 200 lbs. live weight. This hog will cut into two Wiltshire sides, each weighing about 100 lbs. In other words, Wiltshires make up 60 per cent. of the live weight of our bacon hogs. After the head and feet are removed, the middle of an ideal bacon hog should represent about 50 per cent. of the weight of the side, with the shoulders and hams about balance.

Figure 2 sets out the relative position of the various retail cuts to the live hog. The comment in the report on these various cuts is interesting and instructive.

"A long and level back is required because the middle of the carcass fetches the highest price per pound and contains the greatest proportion of the entire weight, as will be seen in Figure 1. Cut 'B,' known as the 'thick back,' contains a relatively heavier proportion of the rib bones than the remainder of the back; the back fat also tends to be thicker at this point, and further, the meat begins to be of the nature of that of the 'collar.' Hence this cut has a lower selling value than the remainder of the back except cut 'D,' the loin, where an awkward bone, known as the 'oyster bone,' must be removed, which makes slicing difficult and somewhat reduces the value.

"The 'prime back' (cut C), provides the best rashers in the side as a whole and is in greatest demand. It is

Should Cultivate Market

Canada Could Supply All Cranberries People Use Here

Canada consumes a considerable quantity of cranberries annually, and most of them are imported. Yet there is one section of the Dominion, at least, admirably adapted to the cultivation of cranberries and growing them to perfection. Why is it not possible for Canada's cranberry needs to be met by the output of that part of the Dominion, especially as there is a tariff of 20 per cent. ad valorem against the imported berries?

The Canadian cranberries are grown in all three of the Maritime Provinces where there is a large acreage of waste bogs unfit for other crops, yet ideally suited to the cultivation of this delicious fruit. The consumption of which has been materially increased through co-operative advertising by United States growers. The Maritime Provinces Trade Commissioner claims that the cranberry growers of that part of the country are favored in every way. A market is assured for all the berries that can possibly be grown for many years; Maritime cranberries are preferred by the trade and the Canadian consumer and are protected under the tariff.

In spite of this, from \$5,000 to \$15,000 25-pound boxes of cranberries are imported into Canada annually and these reach an annual value of from \$250,000 to \$250,000.

In Canada, by reason of climatic conditions, is compelled to rely upon importations of other fruits (if the cranberry can be described in such a manner), there is really no reason why she should be dependent upon another country for her supplies of cranberries.

The Maritime Provinces growers have a rare opportunity to take permanent hold of the Canadian market if they are willing to adopt improved packaging and distribution methods and see that only a quality product is placed before the consumers.

Canadians are eating more and more cranberries each year. The Maritimes can supply all of the wants of the central part of the Dominion if they choose.

Counts For Something

Calm Of Britain In Crisis Is Stabilizing Force

Whatever our faults—and we have been at no pains to conceal them—of our nerves has not been one of them. We have often displayed more confidence in foreigners than they in themselves, and more in ourselves than they in us. We have not been responsible for "runs" either on foreign banks or on our own. It is the imponderable calm which still makes us a stabilizing force in a precarious world despite the fluctuations of sterling and which counts for more than stocks of gold however great.—London Morning Post.

Just His Class

They were parting at the door after a little quarrel. He had tried to make it up, but with no success.

"Very well," he said, turning to take a job. "I'll marry a girl that can take a joke."

"No doubt about that," was the crushing reply. "That's the only kind of a girl you'll get."

Did Not Check Right

The freight agent on the C. and N. W. Railroad received a shipment in which was a donkey, described on the freight bill as "one burro." After checking his goods carefully the agent made his report: "Short, one bureau; over one jackass."

A museum of crime has been opened in Rome.

Gold mining in Australia is more active than at any time since 1920.

Noted Britishers in Bahamas

Completely recovered from the injuries he sustained when he was run down by an automobile in New York, the Right Honourable Winston Churchill, former Chancellor of the Exchequer of Great Britain, and one of the Motherland's most versatile statesmen, is shown with his beautiful daughter, Diana, as they enjoyed the gorgeous sunshine at Nassau, Bahamas. The British statesman has returned to United States for his forthcoming lecture tour.

HIPLINES ARE SMOOTHLY MOULDED AND SNUG THESE DAYS

There are definite slimming qualities about this one-piece model in new Princess lines. It has a becoming V-neckline effect. The front and back panel neck from back to hem is quite an advantage. If you're not so sylph-like as you would wish to be, shirring at either side holds the dress snugly to the figure at the waistline.

Made in a jiffy! You bet! After the sides and shoulders are joined the circular sections are set sleeves into the armholes.

A printed silk crepe made the original, so youthfully smart now beneath the fur wrap. It will prove an economical choice, for it can be worn all spring.

It's stunning too in black transparent velvet or deep blue with a soft sapphire cast canton-tulle crepe silk. Style No. 759 may be had in sizes 14, 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 4 1/2 yards of 39-inch material with 3/4 yard of 39-inch contrasting. Price of pattern 15 cents in stamps or coin (cash is preferred). Wrap coin carefully.

Seeds Are Weed Menace

Studies carried out by weed specialists of the Department of Agriculture at Ottawa show strikingly the menace of weeds through the multitude of their seeds. For instance, a single plant of wild mustard, stinkweed, foxtail, pigweed, or campion, produces from 10,000 to 20,000 seeds; worm-seed mustard about 25,000; shepherd's purse about 50,000 and the tumbling mustard about 1,500,000. Moral: Weeds should never be allowed to go to seed.

Could Learn From Canada

U.S. Might Copy System For Dealing With Undesirables

Uncle Sam, for all his vaunted progress, has some things to learn from his neighbor to the north. Canada has a forthright, stand-no-nonsense method for dealing with the common-sense of undesirables. Our own federal authorities might imitate her with advantage to all concerned, except to the criminal elements and the shyster lawyers.

One prime factor in the problem of law enforcement, which Canada has solved, is a complaint, able, thoroughly trained, federal police force like the Royal Mounted Police. With such investigators as these to get after the big offenders, and with courts which are not so often held up by shyster knaves by criminal lawyers, we might get the same conclusive evidence and the same speedy results.

Canada also has a wise provision in her Naturalization Act calculated to deter aliens from adopting that country as a field for illegal practices. This permits the cancellation of naturalization papers in case of conviction for a criminal offense. We can jail, but we cannot deport a criminal alien, once he has obtained American citizenship.—Los Angeles Times.

The Economic Troubles

Present State Of Affairs Cannot Continue Much Longer

No one dare contemplate a continuance of the present state of affairs. Indeed, the present state of affairs is continuing, and it must get worse, very much, and very quickly worse, or get better. If the leaders fail and continue to mouth tiresome phrases and sentiments that belong to a vanished world whose compartments were small and self-contained in their own hope that the people behind them, suffering the consequences of their blindness, will demand an end of the folly of nationalism? They, in this matter, are ahead of their leaders. What individual Englishman or Frenchman or German or American cares for tariffs and reparations and war debts and armies and navies compared with being allowed to live his life quietly and securely in his own way, sharing in the fruits of human ingenuity, and not every one being asked to take up a rifle and wear a flag, not perpetually tortured by economic insecurity, but left in peace to concern himself, if he has a mind, with the more secret and profound qualities in human life.—Manchester Guardian.

Outdoor Cabins Best

Cheapest Methods Are the Best In Housing Of Hogs

Three reasons are given by the Dominion Animal Husbandman as to why the cheapest methods are best in housing hogs. These are: (a) healthy, vigorous hogs may be obtained from breeding stock housed outdoors during the winter; (b) small, weak litters frequently result when the parents are housed in so-called "hog houses," and (c) hogs are more apt to be diseased when they are housed in "hog houses." For winter use breeding stock of all ages thrive with a semi-outdoor life. Patterning hogs in cabins will rarely cripple. For this class of stock, however, an open-sided, low, straw-covered sleeping berth is better.

Caloric Value Of Feeds

Rations For Stock Defined In Terms Of Fuel Value

Rations are defined in terms of the fuel value because this is the relative value of the different varieties of feed for maintenance purposes, and because practically all the feed with an adult animal is used eventually for producing heat and other forms of energy. All feeds have some fuel value. Fuel values are expressed in calories. A calorie is the amount of heat which is required to raise the temperature of one thousand grams of water one degree centigrade.—Department of Agriculture, Ottawa.

Science and Research

Results Obtained Would Now Indicate That Nothing Is Impossible

"Science and research have produced so many incredible results that we no longer dare to say that anything is impossible. Every new step forward leads to the border of the unknown and creates new problems for research. Now as never before new problems press for solution," with these words, Sam G. Porter, of Calgary, presented his valedictory as president of the Engineering Institute of Canada in convention at Toronto.

Magistrate: "The defendant swears he was perfectly sober."

Policeman: "He was absolutely intoxicated. If he had been perfectly sober he would have known he was drunk and not made a disturbance."

Finally convinced that her husband has deserted her, a woman in Cape Town, South Africa, has applied for a divorce.

Wages on banana plantations in Colombia are being cut 40 per cent.

Farmers Meet To Study Methods Of Combatting Soil Drifting And Moisture Conservation

One of the most unique agricultural meetings ever held in Canada was held Tuesday, January 23rd, in the chapel at the Regina Jail by the farmers in the area surrounding the Jail at the call of the Saskatchewan Department of Public Works. The meeting was largely attended, practically one hundred per cent. of the farmers in the one-half township area surrounding the Jail being present. Some seventeen, carloads of farmers drove in to the Jail yard. Every chair in the reception room was filled so that it was necessary to move up to the Jail chapel in order to accommodate those who attended.

Mr. C. M. Learmonth, the Superintendent of Institutional Farms, acted as chairman. The first speaker was the Hon. J. F. Bryant, Chairman of the Commission on Conservation, and Minister in charge of Institutional Farms. Mr. Bryant welcomed the farmers and remarked that this was the first time in the history of Canada that a large body of farmers had willingly gone to Jail to study farming. At Dartmouth recently the prisoners tried to get out of Jail because they did not get along on their porridge, whereas today a large number of farmers in Saskatchewan had willingly come to the Jail to study farming.

Mr. Bryant dealt at length with the Commission on Conservation, pointing out the work which they had accomplished to date and what they were endeavoring to do, giving information on the climatic conditions, on conservation of water and on the afforestation programme, and pointed out the object of the meeting.

Mr. W. H. Gibson, Superintendent of the Experimental Farm at Indian Head, advocated the plowless fallow, or surface cultivation. He thought that more of this should be done. The farmers had worked their land too much and made too fine a fur in the past. He recommended the duck-foot cultivator rather than the disc-harrow. He did not advocate harrowing after the drill but rather the use of the packer. He stated that the precipitation in 1931 was one-half of the normal precipitation.

Mr. R. H. Vigor of the Department of Agriculture, Regina, discussed strip farming and the benefits in preventing soil drifting, without advocating general strip farming all over the Province. He also spoke of forage growing, recommending a trial of brome grass, western rye and sweet clover. His address was followed by an interesting discussion by the farmers present.

Norman Ross, Director of the Forestry Service, Indian Head, stated that it was a combination of different methods that would produce the desired results. There was a liability in good times to forget the trying experiences of bad years. He developed the thought that if shelter belts were good for the garden and buildings, it was logical that if planted on a large scale they would be of benefit to the crops. He produced evidence indicating successful hedge plantings all over Western Canada and advocated the commencement of a demonstration area and continuing of different methods in a convincing speech, after which he answered all questions asked on tree planting.

W. H. Ford, a prominent farmer from Indian Head, gave his experiences with reference to a half-section which he divided with a single caragana hedge planted north and south at right angles to the prevailing winds. Mr. Ford was very enthusiastic about these hedges, and stated that the first thing he would do in the light of his years of experience, if he were coming to the Regina plains to farm, would be to plant his caragana hedges one mile to one and one-half miles long.

In 1931, Mr. Ford threshed from one hundred acre field protected by hedges, 1,600 bushels of No. 1 Northern wheat, when his neighbors got less than 5 bushels per acre on similar land with similar methods but without the hedges. From years of experience and observation, he strongly endorsed the planting of hedges. Mr. Ford has a beautiful home farm, the buildings surrounded by very fine trees, including firs, elms, ash and pine, which enable him to grow apples, crabapples, plums, plum-cherry hybrids and the small fruits very successfully.

Mr. C. M. Learmonth then outlined the proposed Township Farm Improvement Area, and suggested the forming of an organization of the farmers in the district surrounding the Institutional Farm to carry out the proposed scheme of strip farming, grass and clover growing with wind-breaks and shelter belts, and fields protected with caragana hedges. He pointed out that there were already planted ten acres of caragana seed for seedlings on the Jail farm which would produce approximately one million seedlings for free distribution in 1933, and a similar acreage would be put in the spring of 1932. The farmers in the district were

very much interested in the meeting and the action of the Government in taking the proposed step, the first of its kind in the Province, and the fact that their area was chosen for experimental and demonstration purposes, and that they had the opportunity of working together in the interests of all the farmers of the Province to show the best methods of combatting soil drifting and present climatic conditions. A committee composed of three was agreed upon to interview the individual farmers in the one-half township area with a view to getting them to agree to follow the suggestions made. The committee consists of C. M. Learmonth, representing the Government Institutional Farms, a representative farmer from the one-half township area, together with a representative of the Provincial and Federal Governments. This meeting was the first concrete proposal to carry out the recommendations of the sub-committee of the Commission on Conservation and Afforestation, with reference to the prevention of soil drifting.

St. Bernard Monks Will Found New Monastery

To Carry On Rescue Work In Himalaya Mountains

A group of St. Bernard monks have gone to Tibet to found in the Himalaya Mountains another monastery of the order. They will devote their lives to the same work that are performed by their brothers in the order among the snow-capped peaks of the Swiss Alps.

The announcement of the departure of the monks denies that it is planned to close the hospices in Switzerland. The head of the order will remain there.

Three St. Bernard monks went to Tibet in November, 1840, to found a monastery for work among the Bhuddists with the sanction of the Grand Lama.

The chief work of the monks in Switzerland is the rescue of travelers lost in the mountains. At the approach of a storm St. Bernard dogs are sent out with containers of food and drink attached to their collars, sufficient to keep alive any one caught in a storm until the monks can reach him.

Policing Of Duties

R.C.M.P. To Take Over Alberta Under Three Year Agreement

Superintendent H. M. Newson, director of the criminal investigation branch at Royal Canadian Mounted Police Headquarters in Ottawa, will be placed in direct charge of the policing of Alberta when the federal government takes over the Alberta provincial police on April 1. He will hold the rank of assistant commissioner.

Information to this effect was released by Hon. J. P. Lymburn, Alberta Attorney-General, in a description of the terms of the three year agreement just completed between province and Dominion. Headquarters of the R.C.M.P. in Alberta will be in Edmonton.

The agreement specifies that a force of 220 men is to be maintained in Alberta, and that all men, in good standing in the provincial force are to be retained. All of the duties hitherto performed by the provincial police will be performed by the R.C.M.P.

Alberta's Egg Exports

Last Year Exceeded Previous Record By Fifty Carloads

The export of eggs from Alberta in 1931 was 200 carloads, exceeding the previous record of 1924 by 40 carloads. It is announced by the provincial and federal poultry services. The province exports many times the number of eggs that are imported each year, officials declare.

Of the fresh egg grades exported more than half were in the two top grades. Imports totalled only ten carloads, all of which were bought in British Columbia at a time when local supplies were depleted. The province also exported 85 carloads of poultry as compared with 75 carloads of 1930.

Backgammon Instructor: "Your wife is a good pupil, I find her very apt to see the least."

Husband: "Hh. Sometimes she seems apt to say the most."

Electric bulbs cost thousands of cards, bills, and checks daily.

"Would you marry my daughter if she were not rich?"

"Certainly."

"Then you can't have her, I couldn't bear such a stupid son-in-law."—Esquella, Barcelona.

POSTOFFICE AND DISTRIBUTORS LTD.

Early this morning burglars entered the premises of Distributors Ltd. and the Post Office. The safes in both places were blown open and the money taken. It has not been estimated exactly how much money was stolen; but it is believed to be in neighborhood of \$200. The blowing was apparently done by experts, as the safe doors were neatly blown open, and very little noise was made, although the explosions were heard by people in the old Union Bank building which is about half a block from the Post Office. The time of the explosion was set at about 2:30, as the explosion stopped the Post Office clock at approximately that time. Detectives are now at work on the case.

ANNUAL MEETING CROWN MUNICIPALITY

There was a large attendance of farmers at the Annual Meeting of the Municipality of Crown held on Friday afternoon last, and in some respects it was a lively meeting. It appeared to be the consensus of opinion of the meeting that determined efforts should be made to cut taxes a little, and also that farmers be given a chance to work out part of their taxes on the roads. There were so many interruptions during the meeting that no business could be transacted, as it was impossible to get the viewpoint of several of the speakers. The report of the auditor showed the Municipality to be in a good financial state, in spite of the great amount of work done in 1931.

The retiring councillors were re-elected by acclamation, with the exception of Geo. W. Hand, councillor for Division 4, who will be opposed by O. L. Norris, at the forthcoming election.

DEATH OF MRS. MATTHEWS

Mrs. Edith H. Matthews (nee Garbutt), of McLaurin Beach, Lacombe, wife of the Rev. F. G. Matthews, passed to her rest and reward on February 11th. Death came suddenly. While walking on Jasper Avenue, Edmonton, she was struck and passed away twenty minutes after admission to the hospital. Mrs. Matthews was sixty-two years of age. Early in life she became active in church work and was an officer in the Salvation Army when she first met her husband. For years she laboured with him in city missionary work, sharing actively with him in street preaching and mission work. For the past twenty years she laboured loyally amid the hardships and oftentimes privations of pioneering in church work on "The Foot-Hill Mission," at Lacombe, Alberta, of the Presbyterian Church, doing this work faithfully and well. The years 1913 to 1918 were spent in the Vulcan district. From High River in 1920 they came to Lacombe. In 1928 a call to return to city work in the East was accepted, but by now her heart was in the west, and she returned from Toronto to her home in Lacombe district, McLaurin Beach. She is survived by her husband, Rev. F. G. Matthews, two daughters, Mrs. J. B. Cowell of Reid Hill and Mrs. A. Woods of Lacombe; two sisters, Miss May Garbutt, of Edmonton, and Mrs. G. H. Fennell, of Lyleston, Manitoba; one brother, Charles Garbutt of Douglas Man, and eight grandchildren, and a nephew Cecil Garbutt whom she had cared for.

Interment was made at Vulcan, Alta., on Feb. 14th, 1932 where a year previous, her daughter, Mrs. S. Pinnand was buried in the family plot.

The members of the family are grateful for the kindness of their friends.

W. J. TAYLOR TO HOLD AUCTION SALE, MARCH 17th

On March 17th, W. J. Taylor is holding an Auction Sale of Stock, machinery and Household Goods on N.W. 1/4 of Section 16, Range 26, Township 39, W4th, the Paisley Farm, 1 mile East and 7 miles South of Lacombe. Mr. Taylor has a choice line of farm implements, which are all in A1 condition. He is also offering a nice lot of cattle and horses, in perfect shape. It will pay you to keep this date in mind and attend the sale.

REAL NEWS WE CALL IT!

Alix Free Press—We understand the dance on Friday night of last week was most enjoyable, but we know of at least one young man who left early and with a poor opinion of the dancers.

We can understand a young lady not dancing with certain fellows, but it shows not only bad taste but a lack of good manners to turn down a perfectly respectable young fellow who begs her to dance, giving every reason to believe he was within his rights; furthermore, a young man who refuses to give up his lady, when tagged, shows poor sportsmanship.

When you go to a dance, young man or woman, play the game by treating others as you would wish to be treated.

JUNIOR CHOR CHORCEST

The Junior Choir, under the able direction of Miss H. Barbour and Miss E. Young, are planning to give a concert in St. Andrew's Church,

on Friday, March 11th. This concert which is arranged as an opera, is for the purchasing of new hymn books for the choir, and a considerable effort is being put into fancy costumes and other features. It is hoped it will receive generous support from the public.

ANNIVERSARY SERVICE

Plans are being formulated to hold anniversary services the first Sunday in April, commemorating the fortieth anniversary of the founding of the churches in Lacombe. It is expected to feature this specialty as an "Old Times" affair.

OBITUARY

The funeral of the late George Hutchison, who passed away recently in a Calgary hospital, was held Wednesday, Feb. 17th from St. Andrew's Church.

Mr. Hutchison, who came here in 1907, was born at Barrhead, Scotland, and was thirty-six years of age. His wife predeceased him about eight months ago, and one brother was killed overseas during the war.

He is survived by his parents, Mr. and Mrs. R. Hutchison, two brothers, and four small children, all of Lacombe.

Rev. R. B. Layton conducted the funeral services at the church, and military honors were accorded at the graveside by the Legion who attended the service in a body, the deceased having served overseas in the 8th Battalion.

BASKETBALL

Lacombe Ties Red Deer

On Friday, February 17th, one of the most exciting basketball games Lacombe has ever seen was played here, when the L.H.S. clashed with Red Deer Independents.

The first period ended 5-0 for Red Deer. The Lacombe girls felt a wee bit discouraged, but at the beginning of the second period two free throws were awarded Josie Hay. Only one of the shots went through the hoop. This seemed to put Lacombe on their feet and while Red Deer made 4 more points Minkler and Hay raised the score from 1 to 10.

In the third period there were no baskets made, the score remaining 13 to 9. About half time, Margaret Aldwinckle received a blow which put her in the side lines for the remainder of the game. Our defense was somewhat weakened by the loss of our speedy little guard and Red Deer managed to slip two more baskets just as the whistle blew.

Lineup and Scoring: Red Deer—D. Dillon, 4; I. Dell, 2; Centre, A. Stephenson, 5; Guards, D. Kitching, 2; M. Good, Total 13. Lacombe—Forward: J. Hay, 3; J. Minkler, 10; Centre, L. Todd, 5; Guards, M. Fitzpatrick, M. Aldwinckle. Subs, P. McLaugherty, E. Hunter and R. Rhind.

THE HORSE SALE

Great interest is manifested in the Annual Horse Sale, which will be held on Tuesday and Wednesday, March 8th and 9th. Over three hundred first class animals have been listed for the sale, and more are expected before sale day. There is a splendid demand for horses in the east, and buyers from Montreal and other points east will be here on sale days.

THE CHURCH OF ENGLAND IN CANADA

Diocese of Calgary
St. Cyprian's Church, Lacombe
Reverend: Rev. T. H. Chapman
Feb. 26, 3rd Sunday in Lent
11:00 a.m. Morning Prayer.
2:30 p.m. Sunday School.
7:30 p.m. Evening Prayer.

PLEASE NOTE—There will be a meeting of the Rector, Wardens and Vestrymen after the Evening Service.

NEW COLMAN SEEN IN "THE DEVIL TO PAY"

Dramatist Frederick Londale reveals a hidden side of Ronald Colman's character in the star's latest picture, "The Devil To Pay," which comes to the Avonon tonight. Ronald Colman is thought by casual acquaintances to be cold and forbidding—the very opposite of the playboy role in which he is cast by the author of "The Devil To Pay." But even those who know him only as a shadow on the screen detect in his emotional make-up the kindness, the cheerful, happy-go-lucky, whiff-worry temperament that he portrays so well in his latest production.

Coming: Buster Keaton in "Side-saddle," New York," Mar. 3, 5, 7. Will Rogers in "Young As You Feel," Mar. 10, 11, 12.

BEST WE FORGET CLUB ANNUAL MEETING

The election of officers for 1932 resulted as follows:
President—Mrs. W. Ritsen.
Vice-Pres.—Mrs. C. B. Halpin.
Secretary—Mrs. W. Cranna.
Treasurer—Mrs. S. Edmunds.
Advisory Board: Mrs. Davidson, Mrs. Marshall, Mrs. Rhind, Mrs. Aldwinckle; Mrs. D. M. Reeves.
Mrs. Halpin and Mrs. Rhind were appointed to be a visiting committee for this month.

The treasurer's statement was quite satisfactory and has been audited by Mr. J. T. Finlayson, who was given a hearty vote of thanks for his kindness.

All plans were arranged for the Leap Year Dance to take place in the Adelphi Hotel on the 29th inst. in aid of the funds of the club.

A donation was voted towards the relief of a special case.

BENTLEY NEWS

Born: To Mr. and Mrs. J. H. Steels, of Rimby, a son. Born on Feb. 18th at the Bentley Community Hospital.

The Bentley young people held a coasting party at Hutton's Field, on Wednesday last. A large crowd of young folks attended, and a real time was reported.

Miss McLaggan, of the teaching staff of the Bentley school, spent the week end at her home in Edmonton.

Robert Thorpe, son of Percy Thorpe, suffered a broken rib while coasting on Wednesday night.

The C.V.W.L. Group are holding a whist drive and dance, on Friday, Feb. 26th. Cards at 8:30. Everybody welcome.

Mr. G. Kenny, of the Bank of Montreal Staff, left for Wainwright on Saturday to spend his holidays. He will be away three weeks.

The Women's Hospital Auxiliary are holding a bazaar at the home of Mrs. Johnson on March 19th. The proceeds to go to the Bentley Hospital.

The Mixed Bompel starts on Tuesday night at 8:30 and a large number of rinks have entered. The rinks are split, with one lady, and one outside man on each rink. There are three competitions, and the prize winners in any one competition cannot compete in the other competitions. The fees are: Non-members 50c. This is the largest mixed Bompel Bentley has had, and promises to be the best one in the west. Two draws a night will be played until finished.

The W.I. are holding a Whist Drive at the home of A. B. Haarsstad on Tuesday night.

B.H. Peterson's rink won the Grand Challenge at the Sylvan Lake "Spel." Mr. J. McPherson's rink won the 3rd in the Eaton Competition.

The people of Bentley are looking forward to the Broom Ball game the single men against the married men. The married men say that the single men haven't a chance.

Mr. and Mrs. Frank Thorpe returned from Calgary, where they have been visiting their daughter.

The candidates for election in the divisions of M.D. Lorne 400, are as follows:

Division 2: H. Tolson, F. Christenson, G. E. Ignatious, A. Mickelson.

Division 4: G. Fraiser, C. Thubron.

Division 5: Haarsstad, J. W. Robson.

The election will take place on Saturday, Feb. 27th.

The Polls are as follows:
Div. 2, Boyle School and Sains School.
Div. 4, Andrews School and Benjamin School.
Div. 5, Centre View School and Lockhart School.

DR. MARGARET MCKELLAR COMING

Dr. Margaret McKellar is to be the speaker at the Easter Thank-offering meeting to be held in St. Andrew's Church, on Monday evening, March 28th. It is expected that W.M.S. Auxiliaries in the surrounding district will be invited to attend this meeting. Dr. McKellar will also be the speaker at the Presbyterial meeting to be held in Wetsaskin on March 29th.

SUCCESSFUL BANQUET

Mr. John Inrie was the speaker at the Recognition Banquet last night in Church Hall and gave a most interesting address to the large audience. F. H. Reid gave a recital of the accomplishments of Lacombe farmers, and in section a pleasing musical program was presented. As our paper is printed this morning, a full account of the banquet will appear next week.

CARD OF THANKS

Mr. and Mrs. R. Hutchison and family wish to thank their many friends for the sympathy extended to them during their recent bereavement, and for the many beautiful floral tributes received. They also wish to thank the members of the Canadian Legion for their kindness.

Lacombe Midnight DeKoi, a two-year-old Holstein heifer bred and owned by the Experimental Farm, Lacombe, Alta., in milk under official test in R.P. for 608 days has just finished her first lactation with a production of 10,138 lbs. of milk containing 642.50 lbs. of butter, giving her an average test of 4.28 p.c. fat. This heifer's record was made on twice-a-day milking.

The Last We Forget Club extends a cordial invitation to everyone to attend their Leap Year Dance on Monday next. It is well known to everyone that the dances given by this Club are the best of the season. All money taken in is put to a good purpose, so if you attend, you are helping the Club in their worthy efforts. The Star 5-piece Orchestra will supply the music, so you can count on the best. Be there and enjoy yourselves. The Adelphi Ballroom where the dance is being held is being nicely decorated for this occasion, and as the dance floor is one of the best on the line dancers are as-

ured of an enjoyable evening.

Art Dwan, who was nominated as candidate for councillor for the Town of Lacombe, was elected today by acclamation.

Russell Dagg, a former resident of Lacombe, was killed by a falling rock in a mine at Squamish B.C., last week.

Here and There

Figures of United States motor cars entering New Brunswick in 1931, issued by the provincial bureau of information and tourist travel, show an 8 per cent. gain over 1930. The new record for 1931 is 14,823 as compared with the former record of 14,043 for 1930.

Approximately \$11,000,000 was saved in Canada last year in the cost of construction dwellings and other buildings in 31 cities owing to reduced cost of building materials. Aggregate value in these cities of building permits was \$110,371,410.

The aid of Hon. G. Howard Ferguson, Canadian High Commissioner in London and of Lord Beaverbrook will be sought by the Maritime Provinces representatives who left about \$25,000 from Halifax recently, in an effort to secure the lifting of the British Government's embargo on Canadian potatoes.

A railroad career that has seen many changes and covered much widely scattered territory witnessed another movement when Robert E. Larmour, general freight agent of the Canadian Pacific Railway, was transferred recently from Montreal to Toronto. Mr. Larmour, aside from his railway duties, is well known as one of Canada's outstanding yachtsmen.

Carnival Queen nominations from Edmonton, Drumheller and Vancouver testify to the great popularity of the Banff annual winter carnival to be held February 6 to 12. The Alberta branch of the A.A.U. of Canada has agreed to hold figure skating championships at the carnival and may hold their sliding championships there as well. Every kind of winter sport will be represented.

Entries are coming in rapidly for the great winter event of the 1932 sporting season, the 11th annual Eastern International Dog Sled Derby to be run over a course of 125 miles, spread over the three days February 22-24 and concluding with the Dog Derby Costume Ball at the Chateau Frontenac, February 24. St. Godard, Sappala and other names outstanding in Dog Sled racing are already entered.

The largest shipment of Government-approved cockerels for any one breeder or hatcheryman in Canada arrived recently by Canadian Pacific special at Fergus, Ont., from Winnipeg to the order of J. G. Tweedie, of the Resolute Poultry Farm, Fergus. During the last four years Mr. Tweedie has shipped an average of 30,000 chickens to various points between the Atlantic and Pacific.

Competition between truck and railroad service is shown in a new angle by a letter recently to a Resolute paper. "Labor and Cattle raiser of Niobrara, Nebraska, tried out both methods, shipping cattle by truck and by railroad. On the railroad there was a shrinkage of 21 pounds for each animal by truck there was a shrinkage of 98 pounds each. What the raiser saved on freight the much more the loss on the animals shipped by truck, where the value of the shrinkage amounted to \$12.14 on an animal." (618)

DANCE AT SPRUCEVILLE

There will be a dance in Spruceville hall on Wednesday evening, March 2nd to which you are invited. Morton's Orchestra provides the music.

Here and There

The railroads cannot continue to pay a million dollars a day in taxes; they cannot pay interest on their bonds; they cannot buy new equipment unless they earn the money. In putting the railroads in a sound money-making position we are aiding the whole country, says the Hornell (N.Y.) Tribune Times.

Montreal witnessed an unprecedented invasion from Quebec on the first week-end of February, when over 3000 men, women and children, drawn from all ranks and classes, arrived on the three dollar return Canadian Pacific excursion from the north-west. Four special trains were used.

Seated on a glittering ice throne between two huge natural icebergs, Miss Margaret Stevenson, of Edmonton, in her role as Carnival Queen and assisted by His Honor Lieutenant-Governor W. L. Walsh, opened the 15th Annual Banff Winter Sports Carnival at the Canadian Rockies resort, this month.

The appointment of W. R. Patterson to be General Auditor Canadian Pacific Railway, has been announced, effective February 1, over the signature of E. E. Lloyd, Comptroller, in succession to G. C. Gahan, who died recently. Mr. Patterson, who was born in Toronto in 1890, is one of the youngest railway executives on the continent.

Plans for a national championship for grouse and woodcock dogs are under way and New Brunswick is considered as the best possible locality for staging the event. Field enthusiasts in the United States recently held a meeting to discuss the championship and were greatly influenced by the advice of Ozark Ripley, well known sport writer, who strongly advocated the claims of New Brunswick.

Indication of the contribution made and being made to civilization by the engineering profession was demonstrated at the 46th annual convention of the Engineering Institute of Canada held at the Royal York Hotel, Toronto, recently. A very wide variety of topics formed the basis of speeches and discussions at the convention at which the most outstanding men in the profession were present.

A little brown jug left Grand Pre, N.S. recently, on a long journey south to the Land of Dixie. Unlike the brown jug of the old song, it did not contain ale, or anything likely to excite the U. S. Customs officials. Just water from the historic well of Evangeline at Grand Pre Memorial Park, site of the birthplace of Longfellow's heroine. The water will be used to christen the new 10,000 ton steamer "Acadia" to be operated on the run between New York and Yarmouth, N.S.

Sliding, the sport that has had the greatest growth of any winter activity in the past decade, reached its peak this year with thousands of skiers trekking out to the Laurentians from Montreal, every week-end. Special trains are put at their disposal by the Canadian Pacific Railway. Similar week-end outings are encouraged by this railway in all the great centres of population and it takes a major place in all sport meetings across the continent.

J. J. Maloney and His Poet Laureate

Yesterday we received from J. J. Maloney, (you know, Maloney, the ex-cleric, head of the K.K.K., and general spell-binder) a poem entitled "Asleep at the Switch," and embellished with the said J. J. Maloney's photograph. The poem is illustrated by the figures of a Protestant boy and a Roman Catholic boy going along arm in arm and enjoying themselves as boys will. The inference is of course that the Protestant boy is "asleep at the switch" and that his apparent friend, the Roman Catholic boy, is making a deadly attempt to turn him from the straight and narrow path, and that only Maloney can save him from taking the fatal step.

From the photo with the poem, Mr. Maloney is not a bad looking man, and from what we hear he is a good talker along his one particular line of ballyhoo. He is no doubt making a good thing out of his lectures, and in these hard times a man who can separate the general public from their money in large chunks is to be admired.

But as a poet—we don't know what to say about him or the writer, and will let the public judge from the few verses we reprint. Here's the effusion:

"Asleep At the Switch"
 While this campaign is on in our land,
 And we kindly invite every Roman
 To join with our Protestant band.

And when Adam and Eve the apple did eat,
 They, too, asleep must have been.
 Or else they'd have seen the devil's
 deceit,
 And escaped all this battle with sin.

And stern old Rome, in your convent,
 How can you be so cruel,
 To keep so many women pent,
 And all the world be fooled.

The system that Rome is pursuing
 Is rotten from skin to bone,
 So some clan must be up and a-doing,
 To reform like Luther of yore.

Just a word for you, Pope of Rome,
 Since this thing you have dared to do,
 To make Canada a Roman Catholic
 home

You will surely meet your Waterloo.
 With J. J. Maloney for leader,
 And organized women and men,
 We'll obtain what we want like a
 conqueror.

And not with the sword, but the pen.
 Read the pages of history,
 It repeats itself time after time,
 Man in destruction will be
 When the church is given to crime.

At this point the linotype operator
 had to be carried out and revived.
 While in a dazed condition, before
 he was revived, the linotype operator
 was heard to mutter:

"It seems there's a man named
 Maloney,
 Who's talk sounds a lot like ballyhoo.
 He has a good graft,
 Many listeners are daft,
 And don't think his speeches are
 phoney."

And as Spring is in the air
 and thoughts naturally turn to poetry,
 office boy awoke from his dreamy
 mood and murmured:

Funny guy this ex-cleric J. J.,
 What he says is a dead give-away;
 His words are all trash,
 But he hauls in the cash,
 Which he couldn't in some other way.

The lalmy Spring-like atmosphere and the bright sunshine brought forth the following satire from the roller-washer:
 What famous Ku Kluxer, J. J.
 Gave us all a good laugh yesterday.
 When he sent us a poem
 On the evils of Rome
 And why we should join the K.K.

PROVINCIAL LEGISLATURE
LONGEST DEBATE IN YEARS

Estimates This Week
 After one of the longest debates in years, the address in reply to the speech from the throne was adopted by the legislature on Thursday evening, February 18th.

For nine days, members from north and south, east and west, presented their comments upon the problems confronting the province and western Canada, and advanced their solutions.

During this period 34 speeches were delivered, the largest number during such a debate since 1927 and perhaps before that.

The government was subjected to a steady fire of criticism from the opposition, that is the fighting opposition, during the week. Conservative speakers were in the forefront in taking the treasury branches with a fire of most defensive measures on the part of the ministers.

Time and again, the government was subjected to severe criticism at the hands of Conservative and Liberal speakers. Over-expenditures and extravagance in many respects were cited, while the inaction of the government also was scored.

One of the most severe criticisms of the week was that made by Hugh C. Farthing, of Calgary, Conservative whip, who used his verbal lash on the attorney-general, Hon. J. F. Lymburn, with evident effect.

The attorney-general had rather suggested during his address in the debate on the speech from the throne that cabinet ministers should not be criticized for remarks made outside the house. Mr. Farthing declared that the opposition would at all times insist upon their constitutional rights.

Speaking of the proposed provincial income tax, Mr. Farthing showed how such a levy would work a hardship on the people, especially in the light of incomes being in many cases half of what they were in 1931.

J. J. Bowen, Liberal member for Calgary, also made a most effective speech during this debate, when he strongly criticized the government's financial record.

Another to take part in the debate was Hon. O. L. McPherson, minister of public works, who declared that the government's road policy was sound and thoroughly justified.

John Irwin, Conservative member for Calgary, made an important contribution to the debate when he suggested a solution for Alberta's financial ills. He urged the government to launch an aggressive selling campaign to dispose of 100,000 acres of land to genuine settlers at low prices, which would have the effect of yielding considerable revenue to the province.

The condition of the provincial telephones also came under review during the week, this being a subject for attack during the address of H. J. Montgomery, Liberal member for Wetaskiwin. He urged the department to reduce rural rates.

Hon. V. W. Smith, minister of telephones, who replied, declared that to put a reduction of rates in effect would only cause an increase in losses. He said it would be necessary to consider meeting the situation in some other way. In Manitoba, he said, a reduction in telephone rates did not help the revenue side of the department.

An outstanding address, which Attorney-General Lymburn described as being "statesmanlike" in some way, was that delivered by Col. F. C. Jamieson, Conservative member for Edmonton. He urged the appointment of a minister of industries so that the question of outside markets could be given proper attention.

A. G. Anderson, U.F.A. member for Sedgewick, emphasized the need for cheaper money and the revaluation of Alberta and while A. P. Mitchell, Liberal member for Leduc, spoke on the government's suggestion of lower principal and interest charges. He suggested that the government might well consider a reduction in the interest charged to farmers who had bought school lands.

W. E. Payne, K.C., new Conservative member for Grand Deer, delivered his maiden address in the debate on the speech from the throne. He was warmly congratulated by members on the success of his initial effort.

During his address, Mr. Payne criticized the Public Health act, features of the educational system, especially in relation to text books, and dealt with the government's record of extravagance.

A personal attack upon Premier Broderick by F. C. Moyer, leader of the Independent group, was a feature of the week's debate in the house. He ridiculed some of the suggestions in the premier's address while he also caused the premier to make a flat denial of rumors that he had received monetary offers, one as high as \$100,000, to influence him in dealing with the situation in Turner Valley.

Hugh Allen, U.F.A. member for Peace River, urged the agricultural committee of the house to consider the complaints of farmers as to short weight selling of gasoline in

Chevrolet drivers soon acquire

It's one of the biggest thrills of modern motoring to get behind the wheel of the new Chevrolet and actually know the advantages of a 60-horsepower, six-cylinder motor, silent Synco-Mesh shifting, free-wheeling and down-draft carburetor.

Acceleration! When the light flashes green step on the gas—then glide swiftly away ahead of the traffic! The new Chevrolet gives you matchless "pick-up"—like power that responds to every need. Keep your foot down; watch the speedometer spin up to forty—or forty-five—or more! Then slip the lever into high without even a click. That's Synco-Mesh for you. And you can shift back to second just as easily. If you're "in" free-wheeling you needn't touch the clutch! Once you try the new Chevrolet Six, you'll never be satisfied to drive anything less!

Ask about the GMAC, General Motors' own deferred payment plan. The broad inclusive General Motors Owner Service Policy assures lasting satisfaction.

drums and barrels.

During the week, D. M. Duggan, Conservative leader, asked for a return of all documents in connection with the engaging of H. M. E. Evans, to go east and obtain financial information for the government.

Had there been a readjustment of portfolios, he said, the provincial treasurer would have had time to go east instead of the government having to send Mr. Evans.

During the week, the house also heard addresses by M. J. Connor, U.F.A. for Warner, who dealt with the problems of the south country. H. H. Dakin, Liberal for Beaver River, and J. M. Dochow, Liberal for St. Paul. The latter made strong charges against the government over the alleged inefficiency of officials of the land department in the Bonnyville district.

A. C. L. Gibbs, Labor member for Edmonton, suggested the need for an annual parliamentary conference for legislators of western Can-

ada while Lorne Proudfoot, U.F.A., for Acadia, urged that a economic council should be organized in western Canada.

After disposing of the speech from the throne the members adopted a resolution which provided for an agricultural committee to look into conditions in this province.

Acidity Overcome

Wonderful Results From Famous Vegetable Pills

Instead of having an acid stomach and being constipated, Mr. Frank C. is well. "I can eat anything since trying Carter's Little Liver Pills," he says. Because they are PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels, Dr. Carter's Little Liver Pills are without equal for correcting Constipation, Biliousness, Headaches, Poor Complexion and Indigestion. 25c. & 75c. red pkg., everywhere. To safeguard Melbourne, Australia, against water shortage in dry seasons a reservoir has been constructed that next year will have a capacity of 8,800,000 gallons.

The Dominion Bureau of Statistics report indicates that in the last three months of 1931 the export of Canadian bacon to Great Britain was 4,497,800 pounds, as compared with 2,297,100 in the last quarter of 1930.

Not one cent of public money has been spent this year to bring immigrants to Canada, F. C. Blair, of the immigration department, said in answer to a report that 200 Y.M.C.A. boys were being brought to Canada.

The Farm Meat Supply

Convenient Medium For the Supply of Fresh Meat

Lamb rings provide a practical and convenient medium for the supply of fresh meat to farm homes during the greater part of the year. Eight members form a suitable ring as there are four major cuts on each side of a dressed lamb, these being the leg, loin, rack and shoulder. In the round of eight weeks during which a lamb is dressed each week each member of the ring gets each of the four cuts twice. The cuts are of a size adequate to the needs of the average farm family, supplying a quantity which can be readily consumed. Pamphlet No. 5-N.S., issued by the federal Department of Agriculture, supplies complete details for dressing and cutting lamb carcasses and as to the operation of lamb rings.

Infantile Paralysis

Control Of Disease May Be Accomplished By New Methods

Control of infantile paralysis may be accomplished shortly through immunization, according to Dr. Simon Flexner, director of the Rockefeller Institute for Medical Research.

Dr. Flexner, speaking at the annual meeting of the Goldsmith Home for Crippled Children, said that science is constantly gaining fresh knowledge of the disease and that, in his belief, its control is in sight.

Manitoba May Be
Policed By Mounties

Province Starts Negotiating For Taking Over Patrol Work

Negotiations for merging of Manitoba's provincial police force with the Royal Canadian Mounted Police have been started says Premier John Bracken, who discussed the matter with Dominion Government authorities while in Ottawa.

It is estimated in government circles at Winnipeg, that the province would save \$140,000 a year in the cost of law enforcement by having the R.C.M.P. take over the duties of the provincial force.

A despatch from Ottawa says the change to the R.C.M.P. force for Manitoba policing has been expected for some time. Indications are not lacking that further developments in due course will bring British Columbia also into this reorganization.

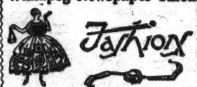

It is known that sentiment in the three maritime provinces is strong for the adoption of this scheme there and that, indeed, one of those provinces has asked that its provincial police be trained by the Royal Mounted. Unofficial comment here is that the Royal Mounted will be gradually developed until its duties comprise the policing of the whole Dominion, exclusive of urban municipalities; and that the headquarters here will eventually become a sort of Canadian "Scotland Yard."

Night Copy Mussolini

Italian Dictator Would Stand No Nonsense From Gandhi

Mussolini would have dealt ruthlessly with Gandhi long ago. But if in our tolerance we hesitated in the past at similarly dealing with a man who inspires murder of others while clinging to the saintly protection of a spinning wheel, the authorities might well have copied other leaves from the Italian Dictator's book. If we agreed that the poor deluded assassin should be punished to the full limit of the law, why should we develop a sensitiveness towards the man who has planted the germ of murder in the assassin's brain.—London Daily Express.

Saskatchewan
Motor Licenses

Minister Of Highways Explains Reasons Why Increase Was Necessary This Year

Decision of the Saskatchewan Government to increase motor license fees by \$5 per license, has been subject of some criticism, and some protests have been received by the Department concerned, according to the Hon. A. C. Stewart, K.C., Minister of Highways.

Discussing the situation, Hon. Mr. Stewart stated suggestions had been made that further increases of the gasoline tax might be used as an added source of revenue and that the motor license fee might be revised downward, if at all. This matter had been carefully considered, said Mr. Stewart, and the motor license fee increase ultimately decided upon for revenue purposes. Elaborating his statement, the Minister said: "With practically one quarter of the population of the province not only incapacitated from contributing to the revenue but also receiving the help necessary to sustainance from the Government, the urgent need for increased revenue is obvious. In taking this action the Government is merely placing the license fee back where it was prior to 1929 when the higher fee prevailed. There were 108,685 licenses issued during 1929. In 1930 there were 108,161 private car licenses issued, and in 1931 the figures had fallen away to 91,276 or 16,885 less licenses than in 1930. On the other hand the gasoline tax had been increased from three to five cents per gallon. This has not resulted in increased revenue proportionate to the increase in the tax. Directly the tax was increased, the exemption claims increased and many claims for exemption have been made under the five cent tax that would not have been made under the three cent tax. Judging from the revenue figures under this item the conclusion can hardly fail to be drawn, that its increase has led to evasions and misrepresentations that would not have occurred had it remained at the present figure. It is also apparent that gasoline has been used in motor cars for which exemptions were often claimed and obtained, without the possibility of any penalty being levied for its prevention. This experience has been similar to that of other provinces and states where the gasoline tax has been increased. When the tax was increased there was also an increase in the bootlegging of gasoline from the States and from Alberta to particularly of a cheaper type of motor fuel like naphtha and distillate. In the portion of Saskatchewan contiguous to the Alberta boundary, the revenues from the gasoline tax have been greatly reduced. Legislation will be introduced to deal with this bootlegging system, but conditions in this respect are difficult, and it is apparent that an increase in the gasoline tax instead of increasing the revenue in accordance with the increase would lead to further tax evasion, wrongful claims for exemptions, and increase possibilities and profits of bootlegging.

In this connection there has been trouble with some of the oil companies failing to pay to the Government the full amount of gasoline tax collections. Previous to this year the oil companies were paid a commission of two and a half per cent on their collections. In view of the fact that the tax was raised from three to five cents per gallon and no extra work entailed on collections, the commission was reduced from two and a half per cent to two per cent. In spite of this fact some of the oil companies have not complied with this regulation, but have deducted two and a half per cent from the collections remitted to the Government. If this condition continues it may be necessary to pass legislation taxing these companies by direct taxation to the extent of this commission, and to make such legislation retroactive. It may also be necessary to consider a direct tax on all gasoline imported into the Province or refined here, instead of the present method of gasoline tax collections, and thus obviate all possibility of defrauding the Government.

Last year a good deal of leniency was shown with regard to the collection of motor license fees in the drought area, but complaints have been received from farmers who pay their licenses that neighbors were running their cars without licenses. This year, a strict observance of the Motor License Act will be enforced, and car owners running their cars either by day or night without licenses will be subject to prosecution and if the fines are not paid, the consequences will be serious. It is obviously impossible to operate the motor license system if discrimination is shown. A reasonable opportunity will be given to owners to pay their licenses, and the law will then be strictly enforced. The Farmer Government of Alberta, which followed the Saskatchewan reduction of licenses in 1931, is this year increasing their license to the same extent as in this province.

Owing to the roads being blocked in the northern portion of the province, few licenses are being taken out in that area as compared with last year. Last Monday, however, the

Motor License Branch at Regina was busier than at any previous time in its history. Renewal of operators' licenses should be made when the motor licenses is purchased, and the old license should be sent in on the application for a new one.

Robots Supplant Bobbies

London Finds Automatic Traffic Signals Equally Efficient and Cheaper

Hundred of policemen have been released from traffic duty in London because robots have proved equally efficient and much cheaper.

Automatic signaling will be adopted on a wide scale before long, and all circuits and crossroads will have their flashing traffic lights. "A jolly good job, too," commented one traffic policeman on hearing the news. "Do you think we like to spend our time remonstrating with motorists who say they cannot see our signals? Do you think we call it a man's job? It was pushed on us by the traffic problem, but we have got plenty of more important jobs."

Important To Medical Science

Accidental Discovery Of A Cure For Paralysis Is Revealed

Because a group of laboratory workers felt unwell after working for a few hours on a high frequency oscillator tube, destined for broadcasting, scientists have discovered means with which cures have been effected on patients, hitherto considered incurable disease.

The story was revealed by Ellis Manning, physicist at General Electric laboratories, Schenectady, N.Y., in an address before a Toronto service club. The discovery, he said, had little publicity so far because, while cures of paralysis have been achieved, the scientists are waiting a year or two to discover if any functional disturbances develop.

Trans-Canada Highway

Ontario Government Asks For Federal Funds To Carry On Work

The Dominion cabinet has under consideration the request of the Ontario government for further appropriation to make it possible to complete work on the Trans-Canada Highway. Hon. William Finlayson, Ontario Minister of Lands and Forests, was in Ottawa recently when he laid before some of the ministers the need for additional appropriations. It is contended that unless the appropriations are made it will be necessary to close down the work, throwing some 10,000 men out of employment.

Bad Constipation And
Sick Headaches Ended
By Vegetable Pills

Formerly a wreck from constipation, Sick Headaches and Indigestion, Mr. V. H. writes: "It was a real-ter day for me when a friend recommended Carter's Little Liver Pills. Results have been marvelous. I am now a healthy man. I am a PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels. Dr. Carter's Little Liver Pills are without equal for correcting Acidity, Bilelessness, Poor Digestion and Indigestion, 25c. & 75c. per box. Ask for CARTER by NAME."

Canadian Bacon Exports

"Feed and Breed" was the call to the farmers of Canada about a year and a half ago when it was found impossible to supply the demand in Great Britain for Canadian bacon. There was a shortage in Canada. The statement issued by the Dominion Bureau of Statistics says that in the last three months of 1931 the export of Canadian bacon to Great Britain was 4,497,800 lbs., as compared with 2,297,100 in the last quarter of 1930.

The gingko tree, or maidenhair, holds a unique place in plant evolution, in that it has not changed in appearance in more than 10,000,000 years.

Not Merely a Saying

Term "Old England" Flittingly Describes Parts Of Country

Announcement is made by a rural council in Essex, England, that a row of Elizabethan houses, built in 1580, which have been continuously occupied since that time, are to be overhauled and made more up to date.

The term "Old England" is surprisingly large number of old houses and buildings in England which have been in use for hundreds of years and are still habitable and giving good service. Notably in York and Chester there are such places. York having a school which is going strong although some six hundred years old. All over the country, in fact, there are bits of "Old England," excellently preserved inside and out, which can be seen checked by jowl with modern premises.

In Holborn, one of the main arteries of London, which merges into Oxford Street, there is a whole block of Tudor buildings, which are occupied by stores and offices. One modern house, Ellen Terry lived in one after she retired and died there.

"Old England" is not merely a saying. It is a fact.

Newspaper Costs

Weekly Expenses Of New York Times Are Enormous

People who want to go into the newspaper business should study these figures:

The New York Times has a weekly payroll of \$178,285. Weekly cable and wire tolls on an average of 87,000 words daily, runs to \$9,672 every week. A total of 3,700 employees are engaged in all Times departments, of which 651 are in the editorial and news departments.

Daily telephone calls number 10,000. Yearly consumption of paper equals 110,000 tons. Ink consumption runs to 4,664,735 pounds. And for welfare activities the Times yearly spends \$500,111.

The New York American, despite the increasing advertising revenue it received as a result of the World folding up, is reported to be again losing money and attempting to raise its advertising rates to make up the difference. Raised from 25 to 45 cents a line some time ago, its business executives now wish to give the rate another boost upward.

Turkey Has Its Flappers

Girls Are Modern But Do Not Smoke Says Journalist

Turan Aziz, sole Turkish journalist on a recent visit to this city, said in an interview: "But yes, we have the flappers in Turkey now. We have our girls doing all that girls on this continent do. They play tennis. They also box; they dance; they go to work in the offices and put 'kohl' on the eyelashes and use powder."

"Do they behave like the girls here, too?" he was asked. "Well, they dance just as well," Aziz said. "But they do not smoke, and that is funny, because in my country we grow the best cigarette tobacco. But still, they don't do that."

New President Elected

Frederick E. Bronson, of Ottawa, was elected president of the Canadian Forestry Association at the 32nd annual meeting of the organization in Montreal. He succeeds R. O. Sweeney, retired president. Robson Black, also of Ottawa, was chosen as vice-president, retaining at the same time his position of general-manager of the association.

Ancient Tool Found

Specimens of a hitherto undiscovered type of stone-bladed tool, used by stone age people thousands of years ago, were found in South Africa recently. Among the implements are scrapers, graters and points, but the most characteristic specimen is like a giant crescent.

"Do you know what 'leisure' is, son?" "Yes, it's the spare time a fellow has to play in, in which he has to work around the house."

Frogs absorb water through the skin; never drink it. They do not breathe but swallow air. When the skin splits as the frog grows old, he pulls it off and swallows it.

"Finish in the beef steers is indicated by a well-covered back and smoothness over the rump and pinbones. Rolls of fat at the sides and at the tail head are objectionable. Fullness at the base of the tongue and at the neck vein, a low, full flank, a full two and a bulging or thickness at the thigh all indicate that the animal has reached the maximum weight for profit."—Pamphlet 19-N.S., Dominion Department of Agriculture.

Creates Never Noise That wood and metal have different rates of expansion and contraction is the explanation for many of those noises that creep suddenly into the car in cold weather. Where wood and metal parts come together snugly under ordinary conditions, contraction may pull them slightly apart in cold weather, permitting rubbing and consequently noise.

Giant African forest hogs grow nearly to the size of a small hippopotamus.

Brouson: "Why did you bargain for a reduction of tax, on that suit when you know you don't mean to pay for it?"

Bright: "So that the poor tailor won't lose so much."

Reducing Running Costs By installing a large water-soaking plant, which will deal with the 4,000,000,000 gallons of water used annually in their locomotives, a British railway expects to reduce their upkeep costs and coal consumption.

Mounties Volunteer
For Arctic Service

Opportunity Is Given Men On Prairies Every Year

Several of the men at present enlisted in the Royal Canadian Mounted Police have volunteered for north service, according to Col. J. W. Spalding, assistant-commissioner of the force.

"The calling for volunteers is an annual opportunity given our men on the prairies," Col. Spalding said, "and already many of them have volunteered."

Men volunteering for north service are subject to strict medical examination, special care being given to the teeth, according to notices sent out calling for volunteers. Only those who are already members of the force are taken for the northern service.

The north service is generally of two years, although in some cases this is extended when requested and the record of those taking for an extension of time shows it advisable.

Ask For Radio Station

Mining Interests Want Radio Station Established In Great Bear Lake Area

A petition signed by a number of prominent mining men and other interests is going forward to the Minister of the Interior, Ottawa, asking that the government install a radio station at Echo Bay on Great Bear Lake in the Northwest Territories. At present there is a station at Hunter Bay, but as this is some distance from Echo Bay, the scene of the principal mining activities in this new field, and inaccessible during the freeze-up and break-up seasons, it practically shuts out the latter area from outside communication for several weeks each year.

Interests associated with the development of this vast prospective field of new mineral wealth point out that a radio station could be operated more advantageously at Echo Bay than at Hunter Bay, but there is sufficient demand for this kind of communication to justify two stations.

The Empire Spirit

Thanks Ottawa Conference Will Assist To Cement Bonds Of Union

Desire of the British Dominions and Colonies to get together despite the recent statute of Westminster which suggested their independence within the Empire, was emphasized by Colonel E. T. Crutchley, United Kingdom representative in the Commonwealth of Australia, who arrived in London, England, on leave.

"I personally have no doubt that the Ottawa conference will result in a very good working partnership between the members of the British Commonwealth of Nations," said Colonel Crutchley. "I feel sure Australia is going to the conference with every intention of cementing the old bonds on a new and very practical basis."

Bees are most famous for their honey-making activities, but in some regions bees are several times as valuable for their aid in cross pollinating fruit trees as for their honey.

Trees or a Dessert?

A short while back one of the Railway Companies sent an expert engineer to the blown out areas of Saskatchewan, to look over the situation and to suggest what steps might be taken to overcome the disaster of soil drifting which has reduced portions of the Province to the condition of a desert.

One of this man's major recommendations was that there should be commenced a systematic and extensive campaign of tree and shrub planting. This, of course, was a common sense statement, and with out any disrespect to the aforesaid engineer, was what a high school boy would have said.

In this portion of Alberta, the elements, particularly wind, have been considerably handicapped in their depredations by the presence of large wooded areas; but many of our citizens are, and have been, putting forth their best efforts to overcome the handicap. Our brush and timber are rapidly disappearing and if the high winds continue it may not be long till we find ourselves in the same plight as the people of Southern Saskatchewan.

As a matter of fact during the past few years large areas around Lacombe have suffered from soil drifting to no inconsiderable extent. In places the top soil has been entirely blown away and the Government has been put to great expense in clearing drift from the highways and digging out the ditches.

It is therefore obvious that all who have the welfare of their district at heart should take such precautions and adopt such conservative measures that the woodland be conserved to the fullest degree possible and that they be added to year by year.

Out of control fires and carelessness in throwing away lighted cigar and cigarette butts are responsible for a great deal of damage and this could be eliminated by a little precaution on the part of our citizens. As a rule heavy timber is found on land least suited to agriculture. This timber serves as great reservoirs for moisture, thereby preventing the drying up of creeks, springs and lakes.

The Dominion Forestry Department has done a good work in bringing to the attention of the public the tremendous value of timber lands and the necessity for their conservation. Schools, Churches, the Press, and organizations such as the U.F.A., could help along the movement with little effort.

In this bleak and windswept country it is something to be regretted that each year at Christmas time, hundreds of thousands of beautiful young spruces are cut down, used as drawing room decorations for a couple of days, and then thrown out in the rubbish heap, no longer

of any use to anybody or anything. Schools and Churches, which should be leaders in all kinds of constructive thought and action, are among the ringleaders in this mad orgy of destruction. A tree is one of nature's finest gifts and it takes nature a long time to perfect this gift. That man should in a few minutes undo the work of years to no useful purpose is a sad commentary on our present day civilization.

In this part of Alberta we are fortunate in having numerous tracts of land on which spruce and shrubs suitable for transplanting grow wild. These may be had at a very slight cost and sometimes for the asking. We are again fortunate in having adjacent to town a very excellent nursery operated by experts who do all manner of tree and shrub planting and landscape gardening at reasonable rates.

Every house in town or country and every school should have at least a background of trees and, when the physical layout permits, a good windbreak. Every badly exposed field should be protected with hedges. Carraignes is suitable for this purpose and free seed is being furnished by the Dominion Government.

The general effects of one man's work along the lines indicated above would be next to negligible, but the concerted action of all would certainly transform the appearance of the countryside, modify the climate and do much to minimize the danger of soil drifting.

—A. D. MacDonald

NINTH ANNUAL**Horse Sale****LACOMBE**

Alberta, Canada

On Exhibition Grounds, at 10 a.m. Sharp

Tuesday and Wednesday

MARCH 8th and 9th

A Splendid Offering by Over 85 Contributors
300 Head Heavy Draft and Agricultural MARES & GELDINGS

Weighing from 1200 to 1700 lbs., all Good, Young animals, very few over 7 and 8 years old.
